

BREAKTHROUGH *TECHNOLOGY,* TAILORED SOLUTIONS.

The Department of Defense and other Federal Government clients rely on constant, reliable, and secure access to critical data. We're proud to serve multiple branches of the United States Government with solutions to meet mission-critical needs.

We offer federal clients the advantage of experience and agility – along with the flexibility to react at the speed of business.

“At the end of the day, our first task is to support the warfighter.”

– Al Wofford, President and Founder of CDO Technologies

Skilled Professionals. *Problems Solved.*

CDO improves your workflow, visibility, and productivity with the perfect combination of leading technology and legendary service.

Software Development & Asset Management Technology

CDO leverages an experience through proven in-depth knowledge and application of state-of-the-art enterprise-level solutions. Through radio frequency identification, item unique identification and mobile data collection, barcode scanning and associated printing technologies. We support the full scope of government services to deliver results.

Network Operations & Infrastructure

Our system includes management and defense, core enterprise services, infrastructure development and operations, data centers, secure wireless, service oriented architecture and voice, video and data consolidation.

Technical Order/Manual & Engineering Data Management

The expertise we apply includes basic TOs and engineering data images. We also provide engineering data acquisition, review, change control, sustainment, quality assurance and repository services.

Cyber Education & Training Program

Our program ensures we have thoroughly trained, experienced, and technically proficient personnel. This education initiative demonstrates our commitment to cultivating an integrated cybersecurity workforce that is competitive from hire to retire, and prepared to protect our nation from existing and emerging cybersecurity challenges.

Cyber Experience

Our experience leads the charge in developing, testing, fielding, sustaining, and employing techniques for Offensive and Defensive Cyber Operations. This creates a reasonable basis for secure operation and a robust security-enabled architecture.

CDO Technologies provides data-collection, advanced technology communication, and managed service solutions to help organizations in any industry operate more efficiently and effectively.

ABOUT CDO

Incorporated in 1995

Certified Minority
Business Enterprise

Top-secret Facility
Clearance

Headquartered in
Dayton, OH

Office Locations:
+ Warner Robbins, GA
+ Chicago, IL
+ Montgomery, AL
+ Aberdeen, MD
